

Solution Requirements

Date	30 June 2026
Team ID	
Project Name	Credit Card Approval
Maximum Marks	4 Marks

Define Functional and Non-Functional Requirements:

- **Functional Requirements (FR)** define specific behaviors, functions, or features of the system (What the system should *do*).
- **Non-Functional Requirements (NFR)** specify the criteria that judge the operation of a system, rather than specific behaviors (How the system should *be*).

Functional Requirements (FR)

(What the system should do)

FR ID	Functional Requirement	Description
FR-1	User Registration & Login	Users can register and login securely to the system.
FR-2	Credit Card Application	Applicants can fill and submit credit card application form.
FR-3	Document Upload	Upload required documents such as ID proof, income proof, address proof.
FR-4	Data Validation	System validates applicant details and documents.
FR-5	Credit Score Evaluation	System fetches credit score and evaluates financial history.
FR-6	Approval Prediction	ML model predicts whether the application is Approved or Rejected.
FR-7	Reason & Recommendations	Provide reasons for rejection and suggestions to improve eligibility.
FR-8	Admin Dashboard	Bank officers can view, review and manage all applications.
FR-9	Reports & Analytics	Generate reports on approvals, rejections and statistics.
FR-10	Notifications	Send instant approval/rejection notification to applicants.

Non-Functional Requirements (NFR)

(How the system should be)

NFR ID	Non-Functional Requirement	Description
NFR-1	Performance	System should give prediction within 5 seconds.
NFR-2	Security	Ensure encryption of data and secure user authentication.
NFR-3	Availability	System should be available 24x7 with minimum downtime.
NFR-4	Scalability	System should handle thousands of applications simultaneously.
NFR-5	Reliability	System should provide accurate and consistent predictions.
NFR-6	Usability	System should be easy to use with a user-friendly interface.
NFR-7	Maintainability	System should be easy to maintain and update.
NFR-8	Compatibility	System should work on desktop, tablet and mobile browsers.
NFR-9	Data Integrity	Ensure data accuracy, consistency and completeness.
NFR-10	Privacy	Protect user data and comply with banking data privacy rules.
